Possession (pŏze·ʃən), *sb.* Forms: 4- possession; also 4-6 -ioun, -ione, -yon, (4 -ioune, 5 -yone, 6 -yowne); (4 possescyon, 5 possesioon, poscescon, 7 pocessyon, 6 -ion). [a. OF. *possessiun, -on* (12th c. in Hatz.-Darm.), ad. L. *possessiō-nem* seizing, occupation, n. of action f. *possidēre*: see POSSEDE, POSSESS.]

1. The action or fact of possessing, or condition of being possessed (see POSSESS 1, 2); the holding or having something (material or immaterial) as one's own, or in one's control; actual holding or occupancy, as distinct from ownership.

a 1340 HAMPOLE *Psalter* XV. 6 Merkis of my possession. 1390 GOWER *Conf.* I. 276 And yaf therto possessioun Of lordschipe and of worldes good. 1473 *Rolls of Parlt.* VI. 91/2 To the Patronage or Possession of the Chirch of Prescote. 1526 *Pilgr. EDGEWORTH *Patron.* xviii, I am not one of those *exigeante* mothers who expect always to have possession of a son's arm. 1875 JOWETT *Plato* (ed. 2) I. 185 Philosophy is the possession of knowledge.

b. *Law.* The visible possibility of exercising over a thing such control as attaches to lawful ownership (but which may also exist apart from lawful ownership); the detention or enjoyment of a thing by a person himself or by another in his name; the relation of a person to a thing over which he may at his pleasure exercise such control as the character of the thing admits, to the exclusion of other persons; *esp.* the having of such exclusive control over land, in early instances sometimes used in the technical sense of SEISIN.

In the Roman Law, 'possession is usually said to consist of two elements—physical control and intention to possess: but in English law the latter element does not assume the same prominence as, in the shape of the *animus domini*, it has been thought to assume in Roman law... The general rule of English law is that exclusive physical control gives legal possession, unless the apparent possessor holds only as servant or bailiff on behalf of another' (J. M. Lightwood in *Encycl. Laws Eng.* (1898) X. 229). Primarily, the term denotes a state of fact, but this fact carries with it legal advantages, and so is the source of rights. If the state of fact could always be ascertained with certainty, and if it always produced the normal legal effects, the subject of possession would present little difficulty; but it is frequently uncertain to whom the actual control of a thing is to be attributed, and, when this question is settled, the law may credit the advantages of possession to some person other than the apparent possessor...Hence arises the distinction between *actual* and *legal* possession. Actual possession denotes the state of fact; but the person to whom are credited the advantages of possession has the legal possession, whether he is the actual possessor or no. Legal possession, when not accompanied by possession in fact, is known as 'possession in law'. (*Ibid.* 228–9.) See this article; also (*inter alia*), *Essay on Possession in the Common Law* by F. Pollock and R. S. Wright, 1888, *Treatise on Possession of Land* by John M. Lightwood, 1894.

Termes Law* 158 Possession is said two wayes, eyther actuall possession, or possession in law. Actuall possession is when a man entreth in deede into landes or tenements to him discended or otherwise. Possession in lawe, is when landes or tenements are discended to a man, and he hath not as yet really, actually, and in deede entred into them. 1706 PHILLIPS, *Unity of Possession*, is when the Possession, or Profit is united with the Property. Thus, if the Lord purchase the Tenancy held by Heriot-Service, then the Heriot is extinct by Unity of Possession, i.e. because the Seignory or Lordship and the Tenancy are now in one Man's Possession. 1766 BLACKSTONE *Comm.* II. xxv. 389 First then of property in possession absolute; which is where a man hath, solely and exclusively, the right, and also the occupation, of any moveable chattels. 1818 CRUISE *Digest* (ed. 2) III. 330 The first degree of title is the bare possession, or actual occupation of the estate, without any apparent right, or any pretence of right, to hold and continue such possession. 1837 BARON PARKE in Meeson & Welsby *Rep.* II. 331 Ownership may be proved by proof of possession, and that can be shown only by acts of enjoyment of the land itself. 1861 J. Its legal senses (for they are many) overlap the popular sense. *Ibid.* 26 The following elements are quite distinct in conception..i. physical control, detention, or de facto possession. ..ii. legal possession, the state of being a possessor in the eye of the law...iii. Right to possess or to have legal possession. *Ibid.* 27 Right to possess, when separated from possession, is often called 'constructive possession'. *Ibid.* 58 A servant in charge of his master's property, or a person having the use of anything by the mere licence of the owner..generally has not possession. 1894 J. M. LIGHTWOOD *Possession of Land* 2 Possession which is recognized by the law .. is known as civil possession. The actual possession may be held by another on behalf of the civil possessor—by his servant or tenant, for example—and here the civil possession is still based on actual possession. 1898 — in *Encycl. Laws Eng.* X. 232 A person holding land as a tenant for years is denied the special form of legal possession known as seisin. The English law, however, differing herein from the Roman law, does not refuse legal possession to bailees. *Ibid.* 236 In the case of goods..the mere right to possession is sometimes described as 'constructive possession', and is allowed the advantages of actual possession.

I. † **1.** From the beginning of the 16th c., applied to men with horses stationed or appointed in places at suitable distances along the post-roads (see Post-stage), the duty of each being to ride with, or forward with all speed to the next stage, the king's 'packet', and at length the letters of other persons, as well as to furnish change of horses to 'thorough-posts' or express messengers riding post. *To lay posts*, to establish a chain of such 'posts' along a route for the speedy forwarding of dispatches.

Posts were at first 'laid' temporarily only, when occasion demanded direct communication with a distant point; they were at length established permanently along certain routes. These 'posts' began in the 17th c. to be called 'post-masters' (q. v.), and were the precursors of the present local postmasters, or persons in charge of the local post offices, who receive and dispatch the local mails. In the 16th and 17th c., these 'posts' had also usually the exclusive privilege of furnishing post-horses to ordinary travellers, and of conducting the business of a posting establishment, which has since been separated from that of the Post Office.

[*Note.* The 'posts' in sense 1 correspond to the *equites dispositi* or 'posted horsemen' of classical and later times (cf. Cæsar *B. C.* III. ci). The earliest known use of *posta*, *poste*, pointing to the modern sense is by Marco Polo, 1298, who applies, in the French text, ch. xcvii. (ed. 1865, 335), *poeste*, and, in the Italian, ch. lxxxi. (ed. 1827, I. 91), *posta*, to the stations 25 miles apart on the great roads, at which the messengers of the Great Kaan or Emperor of China changed horses, and at each of which from 300 to 400 horses are said to have been kept for their service. The expression 'nous disons poeste de chevaus', i. e. 'we say post (or station) of horses', identifies the word originally with It. *posta* in the sense of POST *sb.*[3] The early course of the word in Europe is not altogether clear; but Milanese Latin documents of 1425-8 (L. Osio *Doc. Dipl. Milanesi*, 1872, II. 163, 357) have *portentur die noctuque celeriter per cavallarium postarum*, 'let them be carried day and night swiftly by a post-rider (horseman of the posts)', and *mittat eas per caballarios postarum*, 'let him send them by the horsemen of the posts'. In the second half of the 15th c. F. *poste* is found also as the appellation of the courier, and in this sense had become masculine before 1480. In English, also, the application of *poste*, *post*, to the courier is seen to go back practically to the earliest use of the word.]

b. Post captain. A captain who 'takes post': a designation formerly applied, officially and otherwise, to a naval officer holding a commission as captain, to distinguish him from an officer of inferior rank, to whom the courtesy title of captain was often given, either as being an acting captain, or as being master and commander of a vessel not rated to be commanded by a full-grade captain, and so not said to 'give post'. *Obs.* exc. *Hist.*

So far as the Naval Regulations are concerned the appellation appears to date from about 1731-47, and to have ceased in 1824, when the rule was laid down that only officers appointed to command 'ships of sixth rate and upwards shall henceforth be styled Captains'. But, in unofficial language, the courtesy use of 'Captain' for the 'Master and Commander' of a smaller vessel, and the distinctive appellation 'Post-Captain', lingered to a much later period.

Post, obs. form of *posed*, pa. pple. of POSE *v.*[1]

Post, variant of POUST *Obs.*, power.

Post- (pōust), *prefix*, repr. L. *post*, adv. and prep., after, behind. In L., prefixed adverbially to verbs, as *posthabēre* to hold or esteem after, *postpōnĕre* to place after, postpone, *postscrībĕre* to write after; also to pples., vbl. sbs., and other verbal derivatives, as *postgenitus* after-born, *postpositus* placed after, *postscriptus* written after, *postveniens* coming after, *postparitor* after-getter, heir. More rarely formed on the prep. and an object as, of time, *postauctumnālis* coming (*post auctumnum*) after autumn, post-autumnal; of place, *postlīminium* (a return) behind the threshold, *postscænium* (the space) behind the scenes. In English its use has received great extension, esp. in the prepositional relation, in which compounds are formed almost at will, not only on words from Latin, but also, in technical terms, from Greek, and sometimes even on English or other words, as *post-breakfast*, *post-Easter*, *post-Elizabethan*. These are often opposed to formations in *ante-* or *pre-*.

A. Words in which *post-* is adverbial or adjectival, qualifying the verb, verbal derivative, or other adj. or sb. forming, or implied in, the second element. In compounds derived or formed from L., or on L. analogies, as POST-DATE, -EXIST, -FIX, -PONE, -POSE, -POSIT, -VENE, -GENITURE, -JACENT, SCRIPT (q. v.); also in nonce-wds., sometimes formed after, and as the opposites to, words in *ante-* or *pre-* (exceptionally *pro-*).

b. In *quasi*-adjectival relation to a sb. (chiefly a verbal sb. or noun of action) forming, or implied in, the second element: = Occurring or existing afterwards, coming after, subsequent, later: as *post-acce·ssion*, *-act*, *-a·rgument*, *-co·ntract*, *-division*, *-frui·tion*, *-i·ssue*, *-legitima·tion*, *-opera·tion*, *-pa·rdon*, *-pe·nance*, *-si·gner*, *-varia·tion*. 1868 *Rep. Trial* in *Exeter & Plymouth Gaz.* 13 Mar., Nothing more than postage was paid. There were three posts as shown in the map of 1738, and three or more posts along the Parlor, which had now been removed, but to which ships were moored.

Po·stage sta·mp. [f. Postage[1] + Stamp *sb.*] An official stamp, either a stamp embossed on an envelope or impressed on a card or wrapper, or else (now usually) a small adhesive label having a specified face-valne (in Great Britain from ½*d.* upward), and bearing a design of a certain pattern and colour appropriated to its value, sold by or on behalf of the Post Office, to be affixed to any letter or packet sent by post, as a means of prepayment of postage, and as evidence of such payment.

The design is generally the head of the Sovereign or Ruler (whence in Great Britain the early popular appellation 'Queen's head'), or the national arms or emblems, but many countries use various symbolic or fanciful pictorial devices, historical portraits, etc.

The name *stamp* was originally applied to the marks stamped or impressed by the Post Office on letters for various purposes, among others that of stating whether they were 'prepaid', 'unpaid', 'free', partly paid, or paid by the twnpenny or other post. When adhesive labels and impressed envelopes were introduced in 1840, these took the place of the 'paid' or 'prepaid' stamp, and appear to have been popularly called 'postage stamps' from the first. The official and more accurate name was *postage label*; but the popular usage prevailed; by 1850 *postage label stamp* was in official use, and finally *postage stamp* was accepted. The actual *stamps* (Ger. *briefstempel*) which continued to be impressed by the Post Office after 1840, to show the place and date of postage and arrival, and to obliterate or deface the postage-label, are now usually distinguished as *post-marks* and *obliteration-stamps* or *-marks*.

Postage Label Stamps* (1852) 1 The machine [Archer's] appears to be a very clever and useful invention; we are thoroughly convinced that postage stamps separated by it, having jagged edges, will adhere to letters far better than those cut from the sheets by knives or scissors. 1852 *Ibid.* 2 Mr. Bokenham told me..he was very desirous about the sticking of the postage stamps to the letters, as there were upwards of 400 found daily loose in the bags. *a* 1862 G. H. Lewes *Let. to Parker* (in *Pearson's 76th Catal.* (1894) 39), I have read Fraser, and having read it must keep it and enclose postage stamps. 1862 *Boston Even. S.* 1 Dec. 133 The issue of 'postage currency' by the Treasury Department will doubtless soon displace postage stamps from circulation. 1897 O. Firth *Postage Stamps* 3 Everyone is.. aware of the purpose of a postage stamp, viz. to prepay postage, and to serve as an indication that the proper amount has been paid. 1907 *Post Office Guide* Jan. 139 Embossed or impressed postage stamps cut out of envelopes, post-cards, letter-cards, newspaper wrappers, or telegram forms may be used as adhesive stamps in payment of postage.

Postmaster[2] (pō͝ustmāstəɹ). The name given at Merton College, Oxford, from the 16th c., to the class of poor scholars instituted in 1380 by John Wyllyot; now the equivalent in that college of the term 'scholar' in general collegiate use.

For the first hundred years these appear in the College Register only as *pueri* (*Jl. Johannis*) *Wylyot*, 'Wylyot's boys'. But their essential characteristic was the reception of a limited weekly 'portion', *ebdomadalis portionis*; hence we find them (from 1483) styled *porcionistæ* or (1546) *portionistæ*, a term Englished in the 17th c., as by Wood, as *portionists*. The age of the term *postmaster* is not certain: it occurs in the College Records in 1593 in the established name of *Postmasters' Hall*, the dwelling opposite to the college in which the *pueri* or *portionistæ* had resided till *c* 1575, when they were moved into the college. It also appears as the appellation of the *portionistæ* in English letters of 1610 preserved in the Records. But these casual occurrences show only that it was then a long-established name. As to its origin nothing is known; it has been variously conjectured to be a corruption of *portionista*, or a rendering of **post-magister* or **post-minister*, in allusion to the fact that the *portionistæ* were at one time servitors to the Masters or Fellows, perhaps standing behind their chairs at dinner, etc. But *post-minister* does not occur in the college register, and the occurrence of *post-magister* is doubtful.

Potash (pŏ·tæʃ), *sb.* [Early mod.E. *pot-ashes* pl., app. ad. Du. *pot-asschen* (1599 Kilian, 'quod in ollis . . . asseruentur, ne liquescentes effluant'), mod.Du. *potasch*; so Ger. *pottasche*, Swed. *pottaska*, Da. *potaske*; also F. *potasse* (1577 *pottas*, at Liège, Godef.), It., Pg., mod.L. *potassa*, Sp. *potasa*.]

The sense-history of *potash* and its derivatives is involved in the advance of chemical knowledge. The earliest term was *pot ashes* or *pot-ashes* = Du. *pot-asschen*, applied to the crude products. The essential substance of these, when purified from extraneous matters, was spoken of in the singular as *pot-ash* or *potash*. In 1756 this was proved by Dr. Joseph Black of Edinburgh to be a compound substance, a carbonate, the removal from which of the carbonic acid left a 'caustic alkali' or 'lye' (really the hydroxide, or caustic potash, KHO), which chemists thereafter generally considered to be the true *potash* (in Fr. *potasse*). In 1807 this, in its turn, was shown by Sir H. Davy to be not a simple substance, but to contain a new metal, of which he believed it to be the oxide. To the metal (K) he gave the name *potassium*, to the oxide (on the analogy of *magnesium* and *magnesia*, *sodium* and *soda*, etc.) that of *potassa*. Next year, Dakeel gave reasons for believing that the latter contained also water, and it was subsequently shown to be the hydroxide or hydrate (KHO), the simple oxide being the anhydrous form (K_2O). The salts of potassium, in accordance with the chemical theory of the time, were viewed as compounds of the oxide, and variously named *carbonate of potassa*, *of potass*, *of potash* (= potassium carbonate, K_2CO_3), *chlorate of potassa*, *potass*, or *potash* (= potassium chlorate, $KClO_3$), etc. Commercially 'potash' is still often applied to the carbonate; by chemists usually to the hydroxide or hydrate, caustic potash, KHO, but sometimes to the anhydrous oxide, K_2O, and in names of compounds it is still often used instead of 'potassium', as *chlorate of potash* = *potassium* or *potassic chlorate*.

1. An alkaline substance obtained originally by lixiviating or leaching the ashes of terrestrial vegetables and evaporating the solution in large iron pans or pots (whence the name). Chemically, this is a crude form of potassium carbonate (more or less mixed with sulphate, chloride, and empyreumatic substances), but was long thought to be (when freed from impurities) a simple substance.

a. orig. plural, *pot ashes, pot-ashes*: now applied to the crude substance.

When purified by calcination and re-crystallization, known as *pearl ashes* or *pearl-ash*.

[ad. Sp. *patata*, a variant of BATATA, orig. the native name in Haitian in sense 1. So, in same sense, F. *patate*, obs. It. *potata*, Ger. *potate*.]

Sense 1 is the original; the plant to which it is applied was to Gerarde, in 1597, 'the common Potatoes'; the plant in sense 2, on account of its general likeness to the other as producing esculent tubers, he called from its alleged source 'Virginia Potatoes', and (in his *Catalogue* of 1599) 'Bastard Potatoes'; but when this came to be an important object of cultivation as a food plant, it became 'the potato' par excellence; the exotic plant and tuber originally so named being distinguished by some adjunct. In 17th **c.** instances of the word it is often difficult or impossible to determine which plant is meant.

1. A plant, *Batatas edulis*, N. O. *Convolvulaceæ*, having tuberous roots, for which it is cultivated for food in most tropical and subtropical regions of the world; = BATATA. Its native region is unknown, but it appears to have been seen by the Spaniards first in the West Indies *c* 1500. Now distinguished as *Sweet* or *Spanish potato* (see 3 a).

a. The tuber.

In the 16–17th c. supposed to have aphrodisiac qualities, to which there are frequent references.

2. The plant *Solanum tuberosum*, a native of the Pacific slopes of South America, introduced into Europe late in the 16th century, and now widely cultivated for its farinaceous tubers: see b.

Described in 1553, under the name *papas*, in the *Cronica de Peru* of Piedro Cieza, cap. xl, ¶ 5. Introduced into Spain, it is said, from Quito, soon after 1580, and thence, *c* 1585, into Italy; in 1587 grown at Mons in Hainault, whence in 1588 two tubers were obtained and grown by the botanist Clusius, Keeper of the Botanical Garden to Maximilian II; described by him as *Papas Peruanum*. Soon grown in other botanic gardens, as at Breslau in 1590. The plant may have been brought independently to England, where Gerarde had it growing in 1596; but he was in error in his statement that he obtained it from Virginia (whence the erroneous name *Virginia Potatoes*, long kept up by English writers); for the plant is not a native of Virginia, and was not cultivated there in 16th c. In 1693 its introduction into Ireland was attributed to Sir Walter Raleigh 'after his return from Virginia' (where he never was); but no contemporary statement associating Raleigh's name with the potato has been found. See Brushfield *Raleghana* II. in *Trans. Devonsh. Assoc.* 1898, XXX. 158–197; B. Daydon Jackson in *Gardeners' Chron.* 1900, XXVII. 161, 178.

4. *Gram.* That expresses potentiality or possibility: *potential mood*, a name sometimes given to the subjunctive mood, when used to express possibility; the subjunctive mood used potentially.

In French Grammar, sometimes applied to the Conditional (*j'aurais, je serais*, etc.).

[1524 Linacre *De Emendata Structura Latini Sermonis* (ed. Paris 1550) 30 Potentialem vocamus, quem Graeci per ἂν coniunctionem & verbum duplicis modi, alias indicatiui, alias optatiui, explicant.]

1530 Palsgr. Introd. 31 Modes: every parfyte verbe hath vi, the indicatyve, imperatyve, optatyve or potenciall, the subjunctyve, the condicionall, and the infynityve. 1612 Brinsley *Pos. Parts* (1669) 31 How know you the Potential Mood? It sheweth an ability, will, or duty to do any thing. 1704 J. Harris *Lex. Techn.* I, *Potential Mood in Grammar*, is the same in form with the *Subjunctive*; but differs in this, That it hath always Implied in it, either *Possum, Volo*, or *Debeo*; as *Roget Quis*, that is, *Rogare potest*, a Man may ask. 1824 L. Murray *Eng. Gram.* (ed. 5) I. II. i. 117 That the Potential Mood should be separated from the subjunctive, is evident, from the intricacy and confusion which are produced by their being blended together, and from the distinct nature of the two moods; the former of which may be expressed without any condition, supposition, etc. 1837 G. Phillips *Syriac Gram.* 111, The tenses, especially the future, either alone or in connection with one or more particles, in many cases express a potential, subjunctive, or hypothetical sense. 1876 Mason *Eng. Gram.* (ed. 21) 60 To these moods [Infinitive, Indicative, Imperative, Subjunctive] many grammarians add the Potential Mood, meaning by that mood certain combinations of the so-called auxiliary verbs *may, might, can, could, must*, with the infinitive mood. This is objectionable.

b. With humorous play on sense 2.

5. *Physics.* a. *Potential function*: a mathematical function or quantity by the differentiation of which the force at any point in space arising from any system of bodies, etc. can be expressed. In the case in which the system consists of separate masses, electrical charges, etc., this quantity is equal to the sum of these, each divided by its distance from the point.

Introduced in 1828, by G. Green, with special reference to electricity. Now usually called simply *potential* (see B. 4).

1828 G. Green *Applic. Math. Anal. to Electr. & Magn.* in *Math. Papers* (1871) 9 Nearly all the attractive and repulsive forces .. in nature are such, that if we consider any material point *p*, the effect, in a given direction, of all the forces acting upon that point, arising from any system of bodies *S* under consideration, will be expressed by a partial differential of a certain function of the co-ordinates which serve to define the point's position in space. The consideration of this function is of great importance in many inquiries...We shall often have occasion to speak of this function, and will therefore, for abridgement, call it the potential function arising from the system *S*. 1882 Minchin *Unipl. Kinemat.* 135 The function ϕ is called the potential-function of the strain, and the curves obtained by varying the constant in the equation $\phi = C$ are called curves of equal potential.

b. *Potential energy*: energy existing in a positional form, not as motion: see Energy 6.

Introduced by Rankine in 1853, *potential* being opposed to *actual*, as in sense 2; Thomson and Tait substituted *kinetic* for *actual*, making *potential energy* the opposite of *kinetic energy*. The Latin expression *vis potentialis* had been used by the two Bernoullis and Euler *a* 1750.

[1744 Euler *Methodus inveniendi lineas curvas*, etc. 246 Quamobrem cum vir celeberrimus..Daniel Bernoulli mihi indicasset se universam vim, quae in lamina elastica incurvata insit, una quadam formula quam *vim potentialem* appellat complecti posse.]

1853 W. Rankine *Transform. Energy* in *Sci. Papers* (1881) 203 By the occurrence of such changes, actual energy disappears, and is replaced by Potential or Latent Energy; which is measured by the product of a change of state into the resistance against which that change is made. (The vis viva of matter in motion, thermometric heat, radiant heat, light, chemical action, and electric currents, are forms

of actual energy; amongst those of potential energy are those of the mechanical powers of gravitation, elasticity, chemical affinity, statical electricity, and magnetism. 1866 Odling *Anim. Chem.* 71 We may thus render muscular force latent in a stretched bowstring, raised cannon-ball, or other instrument, for any length of time. This latent force is generally spoken of as potential energy, while the active force exertable at any moment by the flying arrow or falling ball constitutes its actual or dynamic energy. 1868 Thomson & Tait *Elem. Dynamics* 74 The *potential energy* of a conservative system, in the configuration which it has at any instant, is the amount of work that its mutual forces perform during the passage of the system from any one chosen configuration to the configuration at the time referred to. 1875 Gangee tr. *Hermann's Elem. Hum. Physiol.* Introd. 1 The human body..is an organism in which, by the chemical change of its constituent parts, *potential* is converted into *kinetic* energy. 1876 Tait *Rec. Adv. Phys. Sc.* (1885) 364 Excellent instances of potential energy are supplied by..the wound up 'weights' of a clock.., by gunpowder, the chemical affinities of whose constituents are called into play by a spark [etc.]. 1881 Maxwell *Electr. & Magn.* (ed. 2) I. 16 To determine the value of the potential energy when the magnet is placed in the field of force expressed by this potential.

B. *sb.* † 1. A potential agent, a thing that gives power. *Obs. rare.*

1656 Blount *Glossogr.*, *Potentials*, things apt to breed or give power, strength or ability.

2. That which is possible, opposed to what is actual; a possibility.

Lit.* I. xii. 243 The *potential* works *in* them, even as the *actual* works on them! 1883 Edersheim *Life Jesus* (ed. 6) I. 634 With this belief our highest thoughts of the potential for humanity..are connected. 1889 J. M. Robertson *Ess. Crit. Method* 92 The faculty..must be held to reach its highest potential, on the side of literature, in the case of personal gift cultivated by a literary life.

3. *Gram.* Short for *Potential mood*: see A. 4.

4. *Physics.* Short for *potential function*: see A. 5 a. Hence, the amount of energy or quantity of work denoted by this, considered as a quality or condition of the matter, electricity, etc., in question. See quots.

('*Potential* as the name of a function was undoubtedly introduced by Gauss in 1840' (G. F. Becker in *Amer. Jrnl. Sci.* 1893, Feb. 97). [Cf. Gauss *Allgem. Lehrsätze d. Quadrats d. Entfernung* Wks. 1877 V. 203 Zur bequemern Handhabung..werden wir uns erlauben dieses *V* mit einer besonderen Benennung zu belegen, und die Grösse das *Potential* der Massen, worauf sie sich bezieht, nennen.])

1828 G. Green *On Applic. Math. Anal.* etc. in *Math. Papers* (1871) 32 This equation is remarkable on account of its simplicity and singularity, seeing that it gives the value of the potential for any point p', within the surface, when $\overline{V}$, its value at the surface itself, is known, together with [etc.]. 1853 Sir W. Thomson in *Philos. Mag.* Ser. IV. V. 288 *note*, The potential at any point in the neighbourhood of or within a charged body is the quantity of work that would be required to bring a unit of positive electricity from an infinite distance to that point if the given distribution of electricity remained unaltered. 1866 R. M. Ferguson *Electr.* (1870) 277 Instead of the word tension, used with reference to the work that can be effected by a charge when openly insulated, or electro-motive force, the word *potential* is now used. 1867 Thomson & Tait *Nat. Philos.* (1883) II. 29. § 483 This function [the potential] was introduced for gravitation by Laplace, but the name was first given to it by Green, who may almost be said to have in 1828 created the theory, as we now have it. *Ibid.* § 485 The *Potential* at any point, due to any attracting or repelling body, or distribution of matter, is the mutual potential energy between it and a unit of matter placed at that point. 1876 Preece & Sivewright *Telegraphy* 5 Potential implies that function of electricity which determines its motion from one point to another. And the difference of potential, which determines the amount of this motion, is called electro-motive force. 1879 G. Prescott *Sp. Telephone* 37 The difference .. of magnetic potential existing between the diaphragm and the core is increased. 1881 Maxwell *Electr. & Magn.* I. 76 Potential, in electrical science, has the same relation to Electricity that pressure, in Hydrostatics, has to fluid, or that temperature, in Thermodynamics, has to Heat. 1881 Jenkin *Electr.* 51 The effect of contact in producing or maintaining difference of potentials. 1892 *Pall Mall C.* 4 Feb. 6/3 (Mr. Tesla's demonstration.) Potwaller (pɒ·tˌwɒ·ləɹ). [f. POT *sb.*[1] + *waller*, agent-n. from WALL *v.*, OE. *weallan* to boil.]

lit. = *Pot-boiler*, the boiler of a pot; the term applied in some English boroughs, before the Reform Act of 1832, to a man qualified for a parliamentary vote as a householder (i. e. tenant of a house or distinct part of one) as distinguished from one who was merely a member or inmate of a householder's family; the test of which was his having a separate fire-place, on which his own pot was boiled or food cooked for himself and his family.

According to 18th c. statements, the test was at times abused by persons not householders, who in anticipation of an election and of receiving money for their vote, boiled a pot in the presence of witnesses on an improvised fireplace in the open air within the borough, and thus passed as potwallers.

The earliest form *pultes* was app. the L. pl. *pultes* (in med.L. = pap), soon popularly taken as a sing., perh. from its collective sense. Other forms simulate Fr. suffixes *-asse*, *-esse*, *-ice*.

The form in *pult-* continued in general use till after 1750, and is still dialectal. It is difficult to account for the spelling *poult-*, which is found before 1600; the mod. pronunciation is indicated in 1645 by *poltis*.]

Formerly used without change in the pl., a usage still sometimes retained after a numeral, esp. *dial.* and *colloq.*, also in *comb.* as *a five pound note, a twenty pound shot.*

This pound consisted originally of 12 ounces, corresponding more or less to that of Troy *weight*, q.v., which contains 5760 grains = 373·26 grams. This is still used by goldsmiths and jewellers in stating the weight of gold, silver, and precious stones; but as early as the thirteenth or fourteenth century a pound of sixteen ounces was in use for more bulky commodities. This was made a standard for

general purposes of trade by Edward III, and known as the pound *aveir de peis*, i. e. of merchandise of weight, now called Avoirdupois, q.v. This pound of 16 ounces, containing 7000 grains = 453·6 grams, has been since 1826 the only legal pound for buying or selling any commodity in Great Britain. In former times the pound varied locally from 12 to 27 ounces, according to the commodity, pounds of different weight being often used in the same place for different articles, as bread, butter, cheese, meat, malt, hay, wool, etc. See a list in *Old Country and Farming Words* (E. D. S.) 174-5. The Scotch pound of 16 ounces of Troy or Dutch Weight consisted of 7608·9496 grains; the Tron pound kept at Edinburgh = 9622·67 grains. *Pound* is also used to translate foreign names of weights, of cognate origin or representatives of L. *libra*. These vary greatly: in Italy between 300 and 350 grams, in Spain and Portugal, the Netherlands, and some German states between 459 and 469 grams, in other German states, Denmark, etc. between 477 and 510·22 grams. But the standard German *pfund* is now 500 grams, i. e. half a kilogram.

†**1.** *trans.* To weigh. *Obs. rare*—[0].

2. *Coining.* To test the weight of coins (or of the blanks to be minted) by weighing the number of these which ought to make a pound weight (or a certain number of pounds), and ascertaining how much they vary from the standard.

From the earliest times, in the Indenture under which the Master of the Royal Mint produced coins for the King, a limit was assigned within which the weight was to be maintained; and as it was impossible to make every coin of the exact weight, it was customary, before 1870, to fix the number of grains variation permissible in each pound weight, taken at random from the mass of coins, this variation being termed 'remedy for the Master'. Thus, for gold coins, in which 20 troy pounds of standard gold make 934½ sovereigns, the Indenture of 1817 allows a margin of 'twelve grains in the pound weight and no more'. By the Coinage Act of 1870, the 'remedy' was fixed on the piece, as ½ grain on each sovereign, each of which is now separately tested by an automatic weighing apparatus of great delicacy.

1890 *Cent. Dict.* s. v., Pounding in coining. 1907 *Let. fr. Royal Mint*, The present law is far more stringent, but (for particular purposes) we still constantly resort to pounding in the Mint, and always in the case of bronze coins.

1907 *Let. to Editor fr. Cheshire*, The weight of salt contained in one gallon of brine..is usually about 2 lb. 10 oz.; if it is as little as 2 lb. 8 oz., the brine is not worth working. The poundage is measured by a graduated hollow glass instrument, similar to that used in ascertaining the specific gravity of a fluid. (The gallon is not the imperial, but the old wine gallon. The standard poundage is thus more than 3 lb. to the imperial gallon.) The word is in constant use at the Cheshire and Staffordshire Salt Works, but is never used at Droitwich.

†a. **Pour on** (in ME. with indirect passive). To overspread *with* something poured, to suffuse fully. [= L. *suffundĕre*.] *Obs.*

[*Note.* It has been suggested that ME. *pour-e n* was an irregular representative of F. *pur-er*:—L. *pūrāre* to purify (with religious rites). F. *purer*, now 'to scum', had in OF. the senses 'to purify, clarify, cleanse, rinse'; also in Norman 'to drip' (Lajoie revint tant mouillé, qu'il puroyt de toutes parts, *c* 1560 in Godef.), so still in Guernsey (J'o l'cidre qui pure dans l'auge, 'I hear the cider dripping or pouring into the trough' Moisy), and in mod. Norman and other dialects 'to drip, drop, ooze, or flow out', in Burgundy, etc., 'to press, wring, or squeeze juice or water out of anything' (Godef.). English shows no trace of an original sense 'purify', nor even of 'press or squeeze out', and the intransitive sense 6, which comes near that of 'drip or flow out', is not of early appearance; so that the historical connexion of sense is not evident. The phonology also presents difficulty; it is doubtful whether Eng. has any certain instance of *ou* (or even *o*, *oo*) from Fr. *u*:—L. *ū*.]

fig. 1884 tr. *Lotze's Logic* 191 Even in cases where calculation in the strict sense is impossible we are inclined to use the term 'power' when the meaning and importance of a conception is raised in some peculiar manner.

† **b.** *In power* (tr. *ἐν δυνάμει*, Euclid): a phrase used in relation to the squares of magnitudes that are compared, as distinguished from the magnitudes themselves; thus magnitudes are *commensurable* (or *incommensurable*) *in power* when their squares are commensurable (or incommensurable). So *equal in power, of equal power*: see quots. *Obs.*

13. Any form of energy or force available for application to work. *spec.* **a.** Mechanical energy as that of gravitation, running water, wind, steam, electricity, as distinguished from hand-labour; often viewed as a commodity saleable in definite quantities. 1727-41 CHAMBERS *Cycl.* s. v., Power in mechanics denotes a force, which being applied to a machine, tends to produce motion... 14. Capacity for exerting mechanical force, as measured by the rate at which it is exerted, or the work done by it (cf. HORSE-POWER); also applied to a measurable capacity for producing some other physical effect.

1806- [see HORSE-POWER]. 1815 J. SMITH *Panorama Sc. & Art* I. 294 In calculating the power of a machine, it is usually considered in a state of equilibrium; that is, in the state when the power which has to overcome the resistance, just balances it. 1825 J. NICHOLSON *Operat. Mechanic* 67 The product of these two numbers 3070 will express the power of the water to produce mechanical effects. 1849 NOAD *Electricity* (ed. 3) 421 With such a battery power the sparks from the primary coil are brilliant in the extreme. 1881 *Metal Worker* No. 19. 297 Power is the product of force and velocity; that is to say, a force multiplied by the velocity with which it is acting is the power in operation. 1882 MINCHIN *Unipl. Præ-, in med.L. also **pre-**, a L. prep. and adv., meaning 'before'; a very frequent prefix and combining element. In Eng. the L. spelling was formerly not uncommon, but is now usual only in words that are still regarded as Latin, as *præcipe, præcognitum, præcordia, præmunire*, or that are terms of classical antiquity, as *prætor*. In other words PRE- is now the usual form.

There are some 17th century words that became obsolete before the *pre-* form became predominant, which are found only with the spelling *præ-*. This spelling has also been deliberately used by some writers in words commonly spelt with PRE- and so entered in this dictionary.

At an early date in Parisian F., and afterwards also in Norman, *preisier* was levelled (under the vowel of the pres., *prise* from *prieise*) to *prisier*, mod. F. *priser*, which was also taken into Eng. in the 14th c. as *prise(n*, mod. *prize*, and here took the place of the earlier form in the more literal senses associated with the sb. *prīs*, *price*; leaving to *praise* the most tropical sense = Lat. *laudare*, OE. *herian*. A little later the sb. *praise* began to be formed from the vb. in this restricted sense = Lat. *laus*; so that from the 15th c. we have *prise*, *prize* vb. beside *pris*, *price* sb., and *praise* sb. beside *praise* vb.]

These resemble the Eng. word; but their age and history are unknown. Less likely to be connected are Bavar. dial. *prangezen, prangssen* to make compliments, assume airs, *prangss* assumption of airs, affected behaviour, and Swiss dial. *spranzen* to strut. Cf. also the later Prank *v.*[3], the identity of sense of which is remarkable, since it is difficult to equate the forms: see the Note there.]

Pre- (prī, pri, prĭ) *prefix*, repr. L. *præ* adv. and prep. (of place, rank, and time) before, in front, in advance. This was commonly written *prę* or *pre* in med.L., and has become *pre-* in the modern Romanic langs. In Eng. the prefix was sometimes written *præ-* after the revival of learning, but is now regularly *pre-*. In a few words recognized as Latin, and their immediate derivatives, *præ-* is now usual, though even these are frequently, esp. in America, written with *pre-*. See Præ-.

In L. *præ* was prefixed adverbially to a great number of verbs, as *præ-acuĕre* to sharpen in front, *præ-ambulāre* to walk before, *præclūdĕre* to shut in front, *præcognōscĕre* to foreknow, *præcurrĕre* to run before, *præ-ēminēre* to stick out before, be prominent, *præjūdicāre* to judge or pass sentence beforehand, *præmordĕre* to bite off before the point or abruptly; also with verbal derivatives, as *præcentor* a leader in singing, *præcursor* a forerunner, *prædictio* foretelling, *præfātum* fore-speech, preface. Less often with adjs. and sbs., as *præcānus, præmatūrus* grey, ripe before (the time), *prævius* leading the way; *præminister* a servant standing before, *præmolestia* trouble beforehand, *prænōmen* a forename or first name. Also very frequently prefixed as an intensive to adjectives, as *præaltus* high before or in comparison with others, pre-eminently high, *præclārus* pre-eminently clear or bright, *præpotens* exceedingly powerful, prepotent, *prævalidus* very strong. In Latin *præ-* was rarely prefixed with prepositional force, as in *præcordia* the parts in front of the heart, *præripia* places in front of or near the bank of a river, *præmodum* adv. surpassing or beyond measure.

In English many Latin verbs and their derivatives in *præ-* have their representatives in *pre-*, and the use of this prefix has been greatly extended, so that it is now a living element, prefixable to almost any verb of Latin origin, and even sometimes prefixed to words of English or modern origin, as *pre-breathe, pre-embody, pre-plot, pre-sift.* Its use with adjectives or substantives, other than verbal, is less common, and the L. intensive use in *præaltus*, etc., though retained in a few words taken or imitated from L., is not a living use in Eng. But the prepositional construction, in which *pre-* governs the second element, which was so rare in L., has in English received vast extension, so as to become the second great living use, *pre-* being preferred to *ante-* as the opposite of *post-* in new formations, and often substituted for it, as in *pre-baptismal, pre-Christian, prehistoric, pre-Darwinian, pre-reformation* instead of *ante-baptismal, ante-Christian, ante-historic, ante-Darwinian, ante-reformation.* This preference of *pre-* may be partly due to its superior shortness and neatness, but is prob. largely in order to avoid the oral confusion of *ante-* with *anti-*, as in *ante-Christian, antichristian, ante-Darwinian, anti-Darwinian.*

Pronunciation. In all English formations in *pre-*, and some of those formed in Latin or French, in which the sense of 'before' is felt, the prefix is pronounced with a clear *e*, long or short (*ī, i*). In nonce-combinations, the vowel is regularly long, and more or less stressed, e.g. *pre-boil* (prībȯi·l), *pre-Greek* (prī·grī·k), *pre-telegraph* (prī·te·lĭgrȧf). In words of this class of more permanent standing and more independent meaning, the *e* is long (*ī*) when stressed, and usually short (*i*), but capable of being long (*ī*), when not under stress primary or subordinate, e.g. *pre-adamic* (prī-), *prea-damite* (prī- or prĭ-). In words from Latin in which the sense 'before' is obscured or lost, *pre-*, when unstressed, is (prĭ-); when stressed, (prĭ-) or (pre-); thus, *precinct* (prĭ-), *precinct* (prī-), *precipice* (pre·sipis), *precipitous* (prĭsi·pitəs), *prefer* (prĭ-), *preference* (pre·f-). But here also (prī-) is lengthened to (prī-) under rhetorical or factitious stress, as in 'Did you say "repair" or "*pre*pare"?' 'not the "procession" but the "*pre*cession" of the equinoxes'.

Use of Hyphen. Nonce-words and casual compounds of English formation in *pre-* are usually hyphened, as *pre-geological, pre-instil, pre-medicate*; compounds already formed in Latin or French, and their derivatives, are regularly written *indivisim*, as *precaution, predestination, prefigure.* But between these extreme types there are very many combinations in which the use varies, the hyphen being employed whenever its use appears to add to the clearness of the writer's meaning, or when it is desired to emphasize the function of the prefix, to contrast the compound with the simple word or with the analogous compound in *post-*, or the like. In this dictionary, such words are as a rule entered in the unhyphened form, though the quotations will show that both forms are freely used. But in words in which *pre-* is prefixed to a word or element beginning with *e*, the hyphen is conveniently used to separate the two *e*'s, as in *pre-eminent, pre-engage, pre-exist.* (These are sometimes printed *prēeminent*, etc.)

In this dictionary, all important and established words in *pre-* are treated as Main words, and will be found in their alphabetical places. But compounds of rare occurrence, chiefly obsolete, and those of obvious meaning and regular formation, are given below, under their respective classes. Nonce-words and casual combinations can be formed at will, and are unlimited in number, so that only examples showing their formation and use are required.

IV. 6, Intensive. B. *pre-* prepositional. I. Of time: 1, with adj.; 2, with sb. or phr. II. Of place: 3, with adj.]

A. Combinations in which *pre-* is adverbial or adjectival, qualifying the verb, adjective, or substantive, to which it is prefixed.

c. In advb. relation to a vb.; in compounds formed in L., as Preclude, Prefix, Premunite.

III. Of order, rank, importance, quality, degree.

5. In sense 'before in order or importance, above, in preference to, superior to, more than, beyond'.

Common in combinations already in Latin, but rare in English use. See Precede *v.*, Precel *v.*, Predominate *v.*, Pre-eminence, Pre-excellence, Prefer *v.*, Pre-gravitate *v.*, Pre-ordinate *a.*, Preponderate *v.*, etc., in Main words. Also **Pre-epic**, surpassing the epic; **Pre-Luciferian**, surpassing Lucifer.

6. With adjs. and ppl. adjs., in the sense 'before others, pre-eminently, exceedingly, in the highest degree'; as *pre-pious*, *pre-pleasing*, *pre-regular*: Preclare, Precordial 2, Prenoble, etc. Chiefly *Obs.*

B. Combinations in which *pre-* is prepositional, having as its object the sb. forming, or implied in, the second element.

I. Relating to time or order of succession: in which *pre-* = before; anterior, prior, or previous to; preceding, earlier than.

These may be formed for the nonce almost at pleasure; indeed, such combinations as *pre-Alfredian*, *pre-Reformation*, *pre-reformational*, *pre-Shaksperian*, *pre-free-trade*, are rather phrases than words: *pre-Shaksperian dramatists*, *pre-Reformation ritual*, *pre-free-trade conditions*, being only a compacter way of saying 'dramatists before Shakspere', 'ritual before the Reformations', 'conditions (existing) before (the era of) free trade'.

All these are properly hyphened, but the special compounds in i d are often written *indivisim*. *Pre-* is always stressed (prī-), and *e* long.

1. With adjectives (and their derivative adverbs and substantives), or f. *pre-* + a (Lat.) sb. + adjectival ending, as *pre-reformation-al*; forming adjectives, with derivative adverbs and substantives.

Compounds of this type were not used in Latin, and they are of recent appearance in English. The earliest appears to be Pre-adamite, formed in Lat. as a sb. 1655, whence in Eng. as sb. in 1662, and as adj. in 1786; thence *pre-adamitical* in 1716; *prediluvian* occurs 1804, *preprandial* 1822, *prenatal* 1826, *pre-Christian* 1828, *pre-millennian* 1828, *pre-Gothic* 1831, *prehuman* 1844, *prehistoric* 1851, *pre-glacial* 1855, *pre-scientific* 1858, *pre-Georgian* 1861, *pre-Roman* 1863. (Some of these may have been used a little earlier.)

II. Denoting local position: in which *pre-* = before, in front of, anterior to.

These appear to have arisen since 1825: see PREOCULAR 1826, *predorsal* 1831, *prepigmental* 1835.

These are generally written without the hyphen, which may however be used when it makes the composition clearer, as before a vowel. *Pre-* is usually (prĭ-), but may be (prī-) when it immediately precedes the main stress, as in *prevertebral*.

Prebendary (pre·bĕndări), *sb.* (*a.*) [ad. med.L. *præbendārius*, f. *præbenda*: see PREBEND *sb.* and -ARY 1.]

1. The holder of a prebend; a canon of a cathedral or collegiate church who holds a prebend.

Originally, each canon had a *præbenda* or share in the funds of the church to which the clergy-house was attached; in later times when the custom grew up of assigning a particular estate for the support of a particular canon, the latter received also the designation of *prebendary* from the estate so assigned, e. g. 'Canon of St. Paul's and Prebendary of Finsbury'. By act 3 & 4 Vict. c. 113 of 1840, the members of a cathedral chapter except the dean are now called *canons*; but in some chapters of the Old Foundation the name *prebendary* (with a territorial addition) is retained for the titular holder of a disendowed prebend, whose status is, in most respects, similar to that of the *Honorary Canons* in cathedrals of the New Foundation.

3. *Astron. Precession of the equinoxes*, often ellipt. *precession* [*æquinoctiorum præcessio* (Copernicus): called by Hipparchus and Ptolemy *μετάπτωσις* mutation]: the earlier occurrence of the equinoxes in each successive sidereal year, due to the retrograde motion of the equinoctial points along the ecliptic, produced by the slow change of direction in space of the earth's axis, which moves so that the pole of the equator describes a circle (approximately: see Nutation) around the pole of the ecliptic once in about 25,800 years. Hence commonly used to denote this motion of the equinoctial points, of the earth's axis, or of the celestial pole or equator.
As a result of the precession, the longitudes, right ascensions, and declinations of all the stars are continually changing, and the signs of the zodiac shift in a retrograde direction along the zodiac, so that they no longer coincide with the constellations from which they were named (cf. the statement s.v. Cancer *sb.* 2 b).
Lunisolar precession: that part of the precession which is caused by the combined attractions of the moon and sun upon the mass of the earth (the remaining effect being due to the attractions of the other planets).

Predestination (prĭdestinēi·ʃən). [ad. late L. *prædestinātiōn-em* (Augustine), n. of action f. *prædestināre* to Predestine: see -ation. So F. *prédestination* (12th c. in Hatz.-Darm.).] The action of predestinating, or fact of being predestinated; the ordaining or determination of events before they come to pass; pre-appointment by, or in the way of, fate or destiny; foreordination.

1. *Theol.*, etc. The action by which God is held to have immutably determined all (or some particular) events by an eternal decree or purpose.

'*Predestination* is a theological term, sometimes used with greater latitude to denote the decree or purpose of God by which He has from eternity immutably determined whatever comes to pass; sometimes more strictly to denote the decree by which men are destined to everlasting happiness or misery; and sometimes with excessive strictness to denote only predestination to life or election' (Marcus Dods in *Encycl. Brit.* (1885) XIX. 668/1).

a. The action of God (held by Christians generally) in foreordaining or appointing from all eternity certain of mankind through grace to salvation and eternal life. (In this sense = *election*, and opposed to *reprobation*.)

b. The action of God (insisted upon in some systems of doctrine, esp. those associated with the names of St. Augustine, St. Thomas Aquinas, and Calvin), in foreordaining the future lot and fate of all mankind in this life and after death (including their salvation or perdition); and, generally, His foreordaining of whatsoever comes to pass. Predestination, in that it respecteth the Reprobate, is called Reprobation: in that it respecteth the saved, is called Election. 1645 Ussher *Body Div.* (1647) 91 What is Predestination? 3. Attached to farms or to the land; owing service as tenanting land, as *predial serf, slave, bondage, labour, servitude, slavery, villeinage*, etc.

1754 Hume *Hist. Eng.* I. App. i. 97 There were two kinds of slaves..household slaves..and prædial or rustic. 1757 Burke *Abridgm. Eng. Hist.* II. i, And here these writers fix the origin of personal and predial servitude in England. 1818 Hallam *Mid. Ages* (1872) I. ii. 1. 150 Scarcely raised above the condition of predial servitude. 1839 Keightley *Hist. Hence **Pre·dialist,** one of a class or order of landholders; **Predia·lity,** the state of being predial.

1762 tr. *Busching's Syst. Pre-diastolic: see Pre- B. 1.

Pre·diatory, *a.* [ad. L. *prædiātōri-us*, f. *prædiātor* a purchaser of mortgaged lands, a dealer in landed estates, f. *prædium*: see Predial.] Of or relating to the sale of land.

1727-41 Chambers *Cycl.* s.v. *Debt*, *Prædiatory Debt*, is that arising from an alienation of lands, &c. the whole purchase whereof has not been paid.

Predicability (predikăbi·lĭti). [ad. med.L. *prædicābilitās* (*a* 1280 in Albertus Magnus *De Predicabilibus*), f. *prædicābilis*: see Predicable and -ity.] The quality of being predicable.

1785 Reid *Intell. Powers* v. vi. (1803) II. 178 Universals have no real existence. When we ascribe existence to them..their existence is nothing but predicability, or the capacity of being attributed to a subject.

Predicable (pre·dikăb'l), *a.* and *sb.* [a. F. *prédicable* adj. and sb. (1582 in Hatz.-Darm.), or ad. L. *prædicābilis*; in med.L. that may be affirmed, predicable, neut. *prædicābile*, pl. *-bilia*, as sb. (in Lambert of Auxerre, Petrus Hispanus, and Albertus Magnus, 13th c.), whence B.; f. L. *prædicāre* to Predicate: see -able.]

A. *adj.* That may be predicated or affirmed; capable of being asserted.

1598 Florio, *Predicabile*, predicable. 1667 Waterhouse *Fire Lond.* 51 Made that predicable of London which Florus writes of Samnium. 1722 Wollaston *Relig. Nat.* v. 73 It will always be predicable of him, that he was the doer of it. *c* 1730 A. Baxter *Enq. Nat. Soul* vii. § 18. 320 A thing that hath solidity, figure, &c., as properties belonging to it, or predicable concerning it, must be a solid, figured thing. 1842 Abp. Thomson *Laws Th.* § 69 (1860) 11 Predicable classes, or classes of conceptions which can stand as predicates. 1843 Carlyle *Past & Pr.* III. xii, A people of whom great good is predicable. 1884 H. *Lotze's Metaph.* 142 All relations which can be discovered between the two are predicable of them on exactly the same footing.

B. *sb.* In general sense: That which may be predicated.

1785 Reid *Intell. Powers* v. i. (1803) II. 110 A predicable therefore signifies the same thing as an attribute. 1837 Hallam *Hist. Lit.* I. I. iv. § 79. 322 This method appears to be only an artificial disposition..of subjects and predicables, according to certain distinctions. 1906 Joseph *Introd. Logic* iv. 54 A predicable is merely that which can be predicated: viz. that which is universal, not an individual; all kinds, qualities, states, relations, etc., are predicable, and they are universal, because they may be exemplified in and belong to more than one individual subject.

b. *spec.* in Aristotelian Logic (in *pl.*, tr. Gr. κατηγορικά): The classes or kinds of predicates viewed relatively to their subjects, to one or other of which classes every predicated thing may be referred; second intentions of predicates considered in relation to subjects.

Of these relations Aristotle (*Topica* I. iv, v) recognized four, viz. *genus* (γένος), *definition* (ὅρος), *property* (ἴδιον), *accident* (συμβεβηκός). Under *genus* he made the subdivision of *difference* (διαφορά). The list was subsequently modified by Porphyry and by the early Schoolmen, by the omission of *definition*, and addition of *species* (εἶδος), giving the 'Five Predicables', *genus, species, difference, property, accident.*

1551 T. Wilson *Logike* 3 b, I begin with the predicables because they shewe how much every word doth comprehend in it selfe. *Ibid.*, They be called predicables because some one thing is spoken of an other. 1656 Blount *Glossogr.* s. v., In Logick there are five Predicables, otherwise called Porphyries five terms. 1766 Goldsm. *Vic. W.* vii, The essence of spirituality may be referred to the second predicable. 1864 Bowen *Logic* v. 112 In his analysis of Judgments, Aristotle was led to consider how many kinds of Predicates there are, when viewed relatively to their Subjects; in other words, to determine the Second Intentions of Predicates considered in relation to Subjects. Thus was formed his celebrated doctrine of the Predicables.. which was considerably modified, but not improved, by his followers, Porphyry and the Schoolmen. 1906 Joseph *Introd. Logic* iv. 92 The Porphyrian list of predicables substitutes *Species* for *Definition*. But that difference implies a change in the point of view. *Ibid.* 96 It would be well to abandon the Porphyrian list of predicables in favour of the Aristotelian.

c. In the philosophy of Kant: see quot.

1902 *Baldwin's Dict. Philos.* II. 325/2 Kant undertook to set up his own 'predicables of the pure understanding', which were to be derivative conceptions under the categories.

Hence **Pre·dicableness** (1727 in Bailey, vol. II); **Pre·dicably** *adv.*

1727-41 Chambers *Cycl.*, *Predicably, prædicabiliter*, is used in the schools in opposition to *prædicamentally*.—Thus, matter is said to be united to form *predicably*, or *per accidens*; to exclude the notion of a predicamental accident.

Predicament (prĭdi·kămĕnt). Also 7 præ-. [ad. late L. *prædicāmentum* (Augustine) something predicated, a predicament, a quality (transl. Gr. κατηγορία of Aristotle), f. *prædicāre*: see Predicate *v.* and -ment. So F. *prédicament* (13th c. in Hatz.-Darm.).]

Trans.* XCI. 99 Bringing $x\sqrt{-1}$ under the predicament of quantity. 1864 Bowen *Logic* v. 116 Having determined the Second Intentions of Predicates, which are the Predicables, Aristotle attempted to carry the analysis of Judgments one step farther by determining their First Intentions, and was thus led to form his celebrated list of the ten Categories or Predicaments, [in which] he inquired how many and what particular things may be predicated of any Subject.

2. A class about which a particular statement is made; = Category 2.

a 1548 Hall *Chron.*, *Edw. IV* 248 b, We beyng called reasonable creatures and in that predicament, compared and

Predicamental (prĭdikămē·ntăl), *a.* Also 7 præ-. [f. prec. + -AL.] Of or pertaining to a predicament, or the predicaments.

1. *Logic.* That which is predicated or said of the subject in a proposition; the second term of a proposition, which is affirmed or denied of the first term by means of the copula, as in 'this man is *my father*', 'Peter is *a man*', 'all men are *mortal*', 'the sun is *rising*'. (At first used in L. form, *prædicatum*.)

1532 More *Confut. Tindale* Wks. 451/1 Where the thinges that we speake of or the article or ye diuersitie of the word whiche is in the verbe in our englishe tonge, .. maketh the matter open which of the two termes we take for *subiectum* & which for *prædicatum*. *a* 1555 Ridley *Treat. Mor.* (1731) 95 As Aristotle observes in all Affirmation, and Negation at least, the Predicate is always Universal. 1754 Edwards *Freed. Will* I. iii. 16 When the Subject and Predicate of the Proposition, which affirms the Existence of any Thing, either Substance, Quality, Act or Circumstance, have a full and certain Connection, then the Existence or Being of that Thing is said to be necessary in a metaphysical Sense. 1809-10 Coleridge *Friend* (1818) III. 212 Existence is its own predicate (i. e. The word *is* when it means *exists* is a predicate as well as a copula). *c* 1840 [see Quantification]. 1867 Fowler *Deductive Logic* II. i. 23 The term affirmed or denied is called the *predicate*, the term of which it is affirmed or denied the *subject*, the connecting verb..the *copula*. *Ibid.* iv. 34 All negative propositions distribute their predicate, whereas affirmative propositions do not.

2. *Gram.* The statement made about a subject, including the logical copula (which in a verb is expressed by the personal suffix).

The grammatical predicate is either a simple verb, or a verb of incomplete predication with its complement.

a 1638 Mede *Wks.* (1672) 81 Thus much of the Subject, 'The Righteous': Now I come to the Predicate, 'shall be in everlasting remembrance'. [1668 Wilkins *Real Char.* II. i. § 6. 46 Actions or Passions of things; (..tho it be not properly one simple part of speech, but rather a mixture of two, namely the Predicate and Copula)..Verbe.] 1852 Morell *Anal. Sentences* I. § 9. 14 The predicate affirms respecting the subject either—What it is: or, What it does; or, What it suffers. Man *is mortal*. The snow *falls*. The child *was neglected*. 1858 Mason *Eng. Gram.* §§ 347-8. 92 Inasmuch as the personal terminations of a verb have no existence apart from the verb itself, it is usual (and convenient) in grammar to treat the copula as a part of the predicate. Thus in the sentence 'Time flies', *time* is called the subject, and *flies* the predicate...In using the word *predicate*, we mean the predicate and copula combined. In grammar, the terms *subject* and *predicate* are used in a more restricted sense than in Logic. 1874 Sayce *Compar. Philol.* I. 9 Every predicate must have a subject.

b. An appellation or title that asserts something.

1882-3 *Schaff's Encycl. Relig. Knowl.* 594 Nestorius refused to give Mary the praedicate Θεοτόκος. 1887 *N. & Q.* 7th Ser. IV. 64/2 The noble author, head,..under the 'predicate' of Aghrim, of the eldest branch of the once princely house of Imaney.

d. (= Ger. *prädikat.*) In reference to German and other foreign universities, etc.: The judgement pronounced upon a candidate's work in an examination (e. g. 'cum laude, rite, vix satis', etc.); hence, the class or position obtained by a candidate.

1899 *Daily News* 30 May 8/5 At the examination he very often was at a loss for an answer, and received very unsatisfactory predicates.

Hence **Pre·dicateless** *a.*, of which nothing can be predicated.

1863 Shedd *Hist. Chr. Doctr.* (1869) I. III. i. 241 There is no such dark predicateless ground; there is no such Gnostic abyss.
